Professional Summary

Backend-focused Software Engineer with 4+ years of software development experience, specializing in Node.js, Express.js, RESTful APIs, PostgreSQL/MySQL, and Sequelize/Drizzle ORM. Experienced in third-party integrations including QuickBooks, Stripe, and Google Calendar, along with AWS workflows using SES, S3, and SNS. Skilled in database modeling, role-based access control (RBAC), offline-first data synchronization, and production application support, with working knowledge of React.js and TypeScript.

Education

Bachelor of Engineering in Information Technology Jan 2024
A. D. Patel Institute of Technology | Anand, India
GPA: 8.9

Experience

Freelance Software Developer | Occubit Solutions — Surat, India

May 2022 – Nov 2023

- Developed software features and RESTful APIs based on project requirements, with a focus on reliable backend integration.
- Worked on backend logic, database-related tasks, and application improvements to support maintainability and reliability.
- Troubleshot defects and refined application workflows; collaborated on delivery of software features for project needs.

Software Engineer | CREST Skillserve — Surat, India
Dec 2023 – Aug 2026

- Designed and developed scalable backend services and RESTful APIs using Node.js, Express.js, Sequelize/Drizzle ORM, and PostgreSQL/MySQL.
- Built TMS and HRMS modules for attendance, performance reviews, probation workflows, and training management, with Google Calendar API integration.
- Engineered offline-first sync between Electron kiosk/POS devices and the web backend; integrated Stripe usage-based billing and analytics dashboards.
- Implemented role-based access control (RBAC) and multi-portal workflows for a claims and contractor management system.
- Integrated QuickBooks (financial sync), Google Distance Matrix (route optimization), and AWS SES, S3, and SNS (inbound email processing).
- Developed reporting and analytics features with Amazon QuickSight and built photo walkthrough documentation modules.
- Collaborated with cross-functional teams on requirements, sprint planning, testing, and production deployments.

Projects

Paradigm CRM – Claims & Contractor Management System
Technologies: *Node.js, Drizzle ORM, Supabase, PostgreSQL, AWS SES/S3/SNS, QuickBooks API, Google Distance Matrix, QuickSight*

- Developed full-stack features for multi-portal workflows serving adjusters, contractors, and clients, with role-based access control.
- Integrated QuickBooks API for invoice synchronization, chart-of-accounts mapping, and financial workflow automation.
- Built an inbound email processing pipeline using AWS SES, S3, and SNS to capture and store claim-related communications.
- Integrated Google Distance Matrix API for adjuster route optimization; built photo walkthrough and report modules.
- Created operational and performance dashboards with Amazon QuickSight.

Kiosk & POS Management System
Technologies: *Node.js, Electron, Stripe, REST APIs*

- Developed backend REST APIs and data workflows for kiosk activity tracking, usage monitoring, and synchronization.
- Implemented offline-first data synchronization between Electron-based kiosks and the web backend.
- Integrated Stripe usage-based billing and built admin dashboards to monitor kiosk activity and operations.

BizzPocket – E-commerce Storefront Creation Platform
Technologies: *Node.js, React.js, PostgreSQL*

- Developed backend APIs and full-stack features (Node.js, React.js) for merchant management and e-commerce storefront creation.
- Implemented product catalog, category, and inventory management functionality.
- Enhanced admin panel features and dashboards for managing merchants, storefronts, and platform operations.
- Resolved bugs and improved APIs and application workflows to strengthen platform stability.

Technical Skills

Languages: JavaScript, TypeScript, SQL, HTML, CSS
Backend: Node.js, Express.js, RESTful APIs, Microservices, RBAC, Third-Party API Integration, Offline-First Data Sync
Frontend: React.js, Electron
Databases & ORM: PostgreSQL, MySQL, Supabase, Sequelize, Drizzle ORM, Database Modeling
Cloud & Integrations: AWS (SES, S3, SNS), QuickSight, QuickBooks API, Stripe, Google Calendar API, Google Distance Matrix
Practices: Agile/Scrum, Code Review, Automated Testing, Production Deployments, Cross-Functional Collaboration

Certifications & Achievements

- SAP Certification

- Azadi Ka Amrit Mahotsav (SSIP) Hackathon – Finalist
- Smart India Hackathon (SIH) – College-level 1st Place
